PROFESSIONAL SUMMARY

Backend Engineer with 4 years building scalable transactional and financial systems, and architecting AI-native development workflows using coding agents and custom skills. Experienced in high-volume event-driven architecture processing up to 50,000 transactions per batch and migrating 500,000+ customer accounts with sub-second latency, Redis caching, and RabbitMQ.

CORE COMPETENCIES

AI-Native Workflows & Skills

Coding Agents & Tooling

High-Volume Event-Driven Systems

REST API & gRPC Microservices

PostgreSQL & Redis Optimization

System Design & Reliability

WORK EXPERIENCE

Bank Rakyat Indonesia (BRI)

May 2023 - Present

Backend Developer & Squad Leader

Jakarta, Indonesia

- Designed an AI-native development workflow with custom AI skills and coding agents (OpenCode, Oh My Pi) for feature implementation, unit testing, refactoring, and complex code remediation.
- Built Mass Transfer and RDN Transaction features processing up to 50,000 transactions per batch across IFT, RTGS, BI-FAST, and SWIFT, using RabbitMQ event-driven architecture to achieve 3x higher processing efficiency.
- Optimized RDN account management for the migration of 500,000+ customer accounts, achieving 5x faster data retrieval through improved search and filtering.
- Developed authentication modules supporting the migration of 120,000+ users and 50,000+ companies from two legacy applications.
- Optimized transaction approval and rejection workflows using background processing and Redis caching, reducing transaction latency by 50%.
- Served as Acting Squad Lead for 2 months, leading Backend, Frontend, and QA on priorities, system design, code/query reviews, and deployment SOPs.

KoinWorks

May 2022 - Nov 2022

Backend Engineer

Jakarta, Indonesia

- Built an internal HR application, eliminating paper-based workflows for leave and document requests, reducing manual processing time by 30%.
- Resolved an average of 50-100 technical support tickets per day during early payment feature stabilization, executing endpoint retriggers, SQL corrections, and API issue resolutions.
- Completed a 1-month intensive Golang bootcamp, building a CRUD RESTful API based on RESTful architecture and standard backend development practices.

EDUCATION

B.S. in Computer Science Binus Online

Aug 2022 - Nov 2024

Jakarta, Indonesia

Associate Degree in Informatics Engineering Politeknik Negeri Bandung

Aug 2018 - Sep 2021

Bandung, Indonesia

SKILLS

Technical: Go, Python, PostgreSQL, RabbitMQ, Redis, gRPC, REST API, C#, System Design, AI-Assisted Development

Tools: Kong API Gateway, Rundeck, Bitbucket, Jira, GitHub, Jaeger, Postman, Swagger, Locust, Oh My Pi, OpenCode, GitHub Copilot, OpenAI Codex, Grok

Languages: English (Professional Working Proficiency), Indonesian (Native)
