PROFESSIONAL SUMMARY

Backend Engineer with 4 years of experience building transactional and financial systems using Go, microservices, gRPC, REST APIs, RabbitMQ, and Redis. Built payment workflows processing up to 50,000 transactions per batch and supported migrations involving 500,000+ customer accounts, with a focus on performance and reliability. Designed AI-native development workflows with custom agents and reusable skills for agent orchestration, implementation, testing, and runtime verification.

EXPERIENCES

Backend Developer | Bank Rakyat Indonesia (BRI)

May 2023 – Present

Squad Leader

Oct 2025 – Dec 2025

- Built Mass Transfer and RDN Transaction features processing up to 50,000 transactions per batch across IFT, RTGS, Clearing, BI-FAST, and SWIFT, using RabbitMQ event-driven architecture to achieve 3x higher processing efficiency.
- Optimized RDN account management for the migration of 500,000+ customer accounts, achieving 5x faster data retrieval through improved search and filtering.
- Developed authentication modules supporting the migration of 120,000+ users and 50,000+ companies from two legacy applications.
- Optimized transaction approval and rejection workflows using background processing and Redis caching, reducing transaction latency by 50%.
- Served as Acting Squad Lead for 2 months, leading Backend, Frontend, and QA on priorities, system design, code/query reviews, and deployment SOPs.
- Designed an AI-native Go development workflow using OpenCode and Oh My Pi, with five specialist coding-agent roles and seven reusable skills covering agent orchestration, backend development, unit testing, runtime verification, code review, and DevOps configuration.

Backend Engineer | KoinWorks

May 2022 - Nov 2022

- Built an internal HR application, eliminating paper-based workflows for leave and document requests, reducing manual processing time by 30%.
- Resolved an average of 50-100 technical support tickets per day during early payment feature stabilization, executing endpoint retriggers, SQL corrections, and API issue resolutions.
- Completed a 1-month intensive Golang bootcamp, building a CRUD RESTful API based on RESTful architecture and standard backend development practices.

EDUCATIONS

Binus Online | Computer Science

Aug 2022 - Nov 2024

Politeknik Negeri Bandung | Informatics Engineering

Aug 2018 - Sep 2021

SKILLS

- Technical: Go, PostgreSQL, RabbitMQ, Redis, gRPC, REST API, Python, C#, System Design, AI-Assisted Development
- Tools: Kong API Gateway, Rundeck, Bitbucket, Jira, GitHub, Jaeger, Postman, Swagger, Locust, Oh My Pi, OpenCode, GitHub Copilot, Claude, ChatGPT, Grok, Gemini.
- Language: English (Professional Working Proficiency), Indonesian (Native)
